

ANTHONY TY MARLER

Winnsboro, Texas 75494 · (903) 474-3647 · tymarler@gmail.com
Senior Application Architect · Inventor · Energy & Manufacturing Systems

PROFESSIONAL SUMMARY

Senior application architect and hands-on technical leader who invents, designs, and operates systems that cut cost and create measurable profit. Named inventor on two issued U.S. patents. Recent work covers AWS cloud, .NET, SQL, OSIssoft PI, SharePoint, Chef, and the Fossil Generation application portfolio for mining, emissions, safety, and mobility. Combines architecture, TCO analysis, and root-cause troubleshooting with the ability to lead day-to-day delivery across cross-functional teams.

SELECTED HIGHLIGHTS

- Designed a cloud-based emissions platform that normalized data from diverse systems to support credit trading, contributing **\$60 million in profit** in the first two months.
- Invented a patented Compaq software-delivery architecture that eliminated more than **70% of computer manufacturing time**.
- Invented a process-intensified biodiesel method that reduced reaction time from **4 hours to 4 minutes**.
- Led architecture, operations, and RCA for the Luminant/Vistra Fossil portfolio (MSHA, emissions, GIS, safety, mobility, PI, SharePoint, AWS/Chef).

CORE COMPETENCIES

Application Architecture · Cloud Configuration & Deployment (AWS, Chef) · .NET / C# / SQL · Project Leadership · Root-Cause Analysis · TCO Analysis · Data Modeling & Database Design · BAM / Application Monitoring · Emissions Compliance · Mining Operations Software · GIS · SharePoint · OSIssoft PI · Tableau

PROFESSIONAL EXPERIENCE

Vistra Corp. | Texas

Dec 2019 – Feb 2025

Senior Analyst / Architect, Generation

- Designed and developed a data-driven process engine that managed dynamic operational tasks and automated steps through completion.
- Designed and developed mine planning and monitoring software to calculate productivity and measure results by shift.
- Built a cloud emissions-credit platform that unified heterogeneous data sources and accounted for \$60 million in profit in the first two months.
- Led design and development of web applications supporting mining, fossil generation, battery, and solar operations.
- Delivered architectural solutions, TCO analysis, and SME support for mining operations, mining software, data modeling, and database design.

Accenture | Texas

Aug 2016 – Dec 2019

Business Application Manager

- Led day-to-day maintenance, enhancement, and operations for the Fossil Applications portfolio serving Luminant generation and mining.
- Directed development efforts across AWS Cloud, Chef, .NET, C#, C++, PHP, SQL Server, MySQL, Tableau, Formotus, TDMobile, StackVision, and NetDAHS.
- Owned troubleshooting and RCA for production issues across ROTT, Skaief, SmartProcedures, GIS, Mobility, Safety Index, Proact, Digital Signage, Qdabra, SharePoint, PI, and land management.
- Drove cloud configuration and Chef-based deployment, plus BAM application monitoring, to improve reliability and reduce operational risk.

Capgemini, LLC | Texas

Feb 2008 – Aug 2016

Senior Application Architect

- Architected and delivered Fossil Generation applications covering MSHA training, emissions compliance, procedures, GIS, safety, mobility, digital signage, and SharePoint.
- Provided architectural solutions for new builds and rebuilds to improve reliability and functionality, including TCO analysis of existing and future-state environments.

- Served as SME for mining operations, mining software systems, data modeling, and database design; led development, troubleshooting, and RCA for complex application issues.
- Introduced mobility (Formotus, TDMobile), OSIsoft PI integration, land-management solutions, and application-monitoring practices that later scaled under Accenture and Vistra.

ADDITIONAL EXPERIENCE

Texas Built Company, LLC | Winnsboro, TX

Feb 1998 – Feb 2008

Owner. Invented a method to speed biodiesel production that reduced reaction time from four hours to four minutes. Built and operated process-intensified reactor technology (patent pending: Texas Built process intensified biofuels reactor technologies).

Samsung / AST Research

Mar 1997 – Feb 1998

Principal Engineer / Worldwide Software Systems Architect. Worldwide software systems architecture for PC manufacturing and configuration platforms.

Compaq Computer Corporation | Houston, TX

Oct 1993 – Mar 1997

Senior Systems Engineer. Invented and developed a patented software-delivery system that eliminated more than 70% of computer manufacturing time. Invented a post-sales configuration method that increased inventory flexibility. Named inventor on U.S. Patents 6,202,070 and 5,974,567.

Automated Response Information Systems, Inc.

Oct 1991 – Oct 1993

Owner. Designed and implemented a hardware-based voice-recognition system for hands-free data collection in harsh environments.

Stanford Telecommunications, Inc.

Jul 1989 – Aug 1991

Systems Engineer. Developed planning and control software for the defense communication satellite network.

Elcom and Associates

Feb 1987 – Jul 1989

Field Engineer. Field engineering and technical support for communications and electronics systems.

U.S. Army

Feb 1984 – Feb 1987

Strategic Microwave System Repair Technician. Maintained strategic microwave communications; completed Army electronics, microwave repair, and cryptographic training.

PATENTS

- **U.S. 6,202,070** (2001) — Computer manufacturing system architecture with enhanced software distribution functions (Compaq; named inventor).
- **U.S. 5,974,567** (1999) — Ghost partition / runtime-selectable file system (Compaq; named inventor).
- **Pending** — Texas Built process intensified biofuels reactor technologies.

TECHNICAL SKILLS

Languages & platforms: C# / .NET, VB.NET, C++ / C++.NET, C, PHP, Java, SQL, AJAX, Chef, Intel Assembly; prior: Ada, FORTRAN, BASIC, VMS/DCL, PRO*C, FOCUS, PAL, Silverlight

Cloud, data & monitoring: AWS, Amazon RDS, Chef, OSIsoft PI, MS SQL Server, MySQL, Oracle, DB2, Tableau, BAM application monitoring, StackVision, NetDAHS

Applications & tools: Visual Studio, SharePoint, ESRI GIS, Formotus, TDMobile, Qdabra, SmartProcedures, Visio, MS Project, LabVIEW, Cursor, Claude, ChatGPT

Domains: Fossil generation, mining operations, emissions compliance and credit trading, MSHA training, behavior-based safety, land management, mobility, digital signage, computer manufacturing software delivery

EDUCATION & PROFESSIONAL DEVELOPMENT

Computer Science coursework and Certificate in Ada, Colorado Technical College. Advanced C++ and Advanced Java, Compaq Computer Corporation. DEC VAX/VMS System Management and System Performance Management. U.S. Army Basic Electronics, Strategic Microwave System Repair, and Cryptographic courses.
